Run Protected Sudden Cardiac Arrest (SCA) events with the AutoPulse Resuscitation System

Automated CPR is a vital tool that can help you run protected SCA events to enhance provider safety while also ensuring high-quality CPR for your patients. These days, protecting your crew is more important than ever.

THE AUTOPULSE® RESUSCITATION SYSTEM OFFERS:

- Automated high-quality CPR that reduces the number of providers required on-scene for an SCA event.

- A disposable LifeBand® that helps avoid cross-contamination of other patients and crew members.

- A disposable hygiene barrier that covers the entire AutoPulse board, offering further protection for crew members. To learn more, visit zoll.com/autopulse-hygiene-barrier.
