

# X SERIES® ADVANCED

Groundbreaking technology in the new monitor/defibrillator from ZOLL®

ZOLL's new X Series® Advanced monitor/defibrillator helps providers manage patients more effectively than ever before. X Series Advanced is the first device of its kind to provide the clinical data EMS teams need to improve outcomes.

## Real BVM Help™ and TBI Dashboard

With groundbreaking new technology available only from ZOLL, the X Series Advanced finally addresses some of the key challenges providers face in both pre-hospital and hospital environments today.

### Real BVM Help – Real-time feedback for ventilation

With Real BVM Help on the X Series Advanced, providers can view delivered tidal volume and rate directly on the monitor. This real-time feedback guides users to deliver high-quality ventilation in a manner that has never been possible until now.

Real BVM Help on the ZOLL X Series Advanced gives providers:

- Target and delivered ventilation volume
- Target and delivered ventilation rate
- A ventilation quality indicator and countdown timer

### TBI Dashboard: The information you need when it matters most

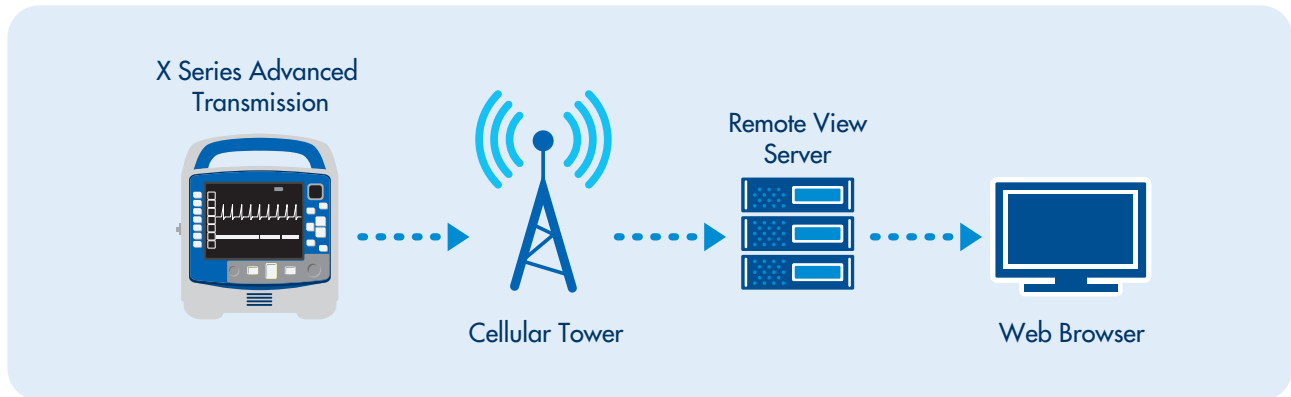

Traumatic Brain Injury (TBI) patients present a unique set of challenges. Early treatment is critical to minimise common secondary injuries.<sup>1</sup>

ZOLL's TBI Dashboard on the X Series Advanced monitor/defibrillator provides trending information on the parameters most critical to a TBI patient, enabling clinicians to quickly detect potential patient deterioration.

## Meet your telemedicine needs with **Remote View** on the X Series Advanced

With Remote View, clinicians can view data from the X Series Advanced at a remote location. This telemedicine solution from ZOLL enables effective decision support that allows EMS providers to meet their telehealth needs.

## **Real BVM Help** integrates with Real CPR Help technologies

For cardiac arrest patients, the X Series Advanced monitor/defibrillator offers both Real CPR Help® and Real BVM Help, giving providers simultaneous real-time feedback on both compression and ventilation quality. When used with adult ZOLL CPR electrodes, the X Series Advanced device displays the Real BVM Help Dashboard next to the Real CPR Help Dashboard.

## Improve your system's performance with **RescueNet CaseReview**

RescueNet® CaseReview gives providers the ability to view data from the X Series Advanced post-case for effective QA/QI. Data available in CaseReview includes ventilation performance with Real BVM Help, CPR performance with Real CPR Help®, and automatic recognition and integration of performance with ZOLL's automated CPR device, the AutoPulse®.

**X Series Advanced:** Groundbreaking technology in the new monitor/defibrillator from ZOLL.
