

TBI Dashboard: The information you need when it matters most

Traumatic brain injury (TBI) patients present a unique set of challenges

Early treatment is critical to minimise common secondary injuries.¹

With TBI Dashboard on ZOLL's new X Series® Advanced monitor/defibrillator, rescuers have the critical information they need to rapidly treat and effectively manage TBI patients.

Management of ventilation

Real BVM Help™ provides real-time feedback to help prevent hyperventilation. Integrated directly into TBI Dashboard, Real BVM Help guides clinicians in providing high-quality manual ventilations to both intubated and non-intubated patients.

TRENDING OF CRITICAL VITAL SIGNS

TBI Dashboard shows trending data on the parameters most critical to treating TBI patients.
